

# simple and fast archiving

## profile

Company	<b>Microflex Services GmbH</b>
CloudiaX Partner	<b>C.K. Solution</b>
Branch of industry	<b>Automation and Process Technology</b>
Located in	<b>Hamburg, Germany</b>
Employees	<b>35</b>
Software solution	<b>CKS.DMS for SAP Business One</b>
Web	<b>www.microflex-services.de</b>

## ease

CKS.DMS integrates easily and seamlessly in SAP Business One and is distinguished by its user-friendliness.

## simplicity

Without spending lots of time and money, CKS.DMS was quickly implemented and easy to adjust.

## saving

We need only 10% of the previously required paper quantity and in addition, the paper / folder flow has improved significantly.

## key challenges

Two of our staff members were exclusively busy with recording all documents for each transaction.

The old system produced a huge amount of paper. Alone the expenses for copying, filing, storing the folders in the archive, again removing after 10 years were immense. A calculation at Microflex showed that the processing of each sheet of paper cost 54 ct.

## solution

The smart, fully integrated CKS.DMS solution for SAP Business One enabled the uncomplicated introduction of a modern and legally compliant archiving solution. The add-on is used to the full, whether for purchase orders, customer orders or incoming invoices. The label printer processes input batches.

Our employees were very relieved and could work with the solution without a lot of training.

The price-performance ratio is very good and one of the characteristics of the solution are low purchase- and support costs.

CKS.DMS for SAP Business One has been in operation since 2013 and is still inspiring.

Processes were simplified and the savings are immense, both financial and temporal.

## customer

Microflex Services GmbH is a specialist in the fields of automation, information technology and process technology.

The company is an economically strong medium-sized company and offers complete solutions for individual customer requirements from different sectors.

## partner

C.K. Solution is specialized in the representation of business processes in IT. The focus is on CRM, warehouse management and document management systems. The benefits of the cloud solution are obvious - ease of use, increased efficiency in workflows, manageable costs, fast amortization, and a very strong return on investment.
