Perfect Complement to **Manage your Inventory**

Accurate and streamlined inventory management is crucial to your ability to deliver on promise, as well as to maintain customer satisfaction and inventory cost control.

COBI.wms is the modern solution for simple and mobile warehouse management. As a reliable add-on, COBI.wms offers you the possibility to book all activities from the warehouse directly into SAP Business One.

Inventory and warehouse management tools help manage detailed warehouse data, track and record stock movements, and plan and release production orders based on your material requirement planning.

Take Advantage of **Extensive Mobile Functionality**

Productivity

Proactively meet your warehouse management demands and reduce errors and training costs.

Improve your inventory and supply chain management by running flexible, mobile and fully integrated.

Real-Time Data

Achieve real-time synchronization of goods receipts and warehouse inventory.

Generate reports in SAP Business One with real-time data or overview your stock and items on the go with the mobile COBI.wms app.

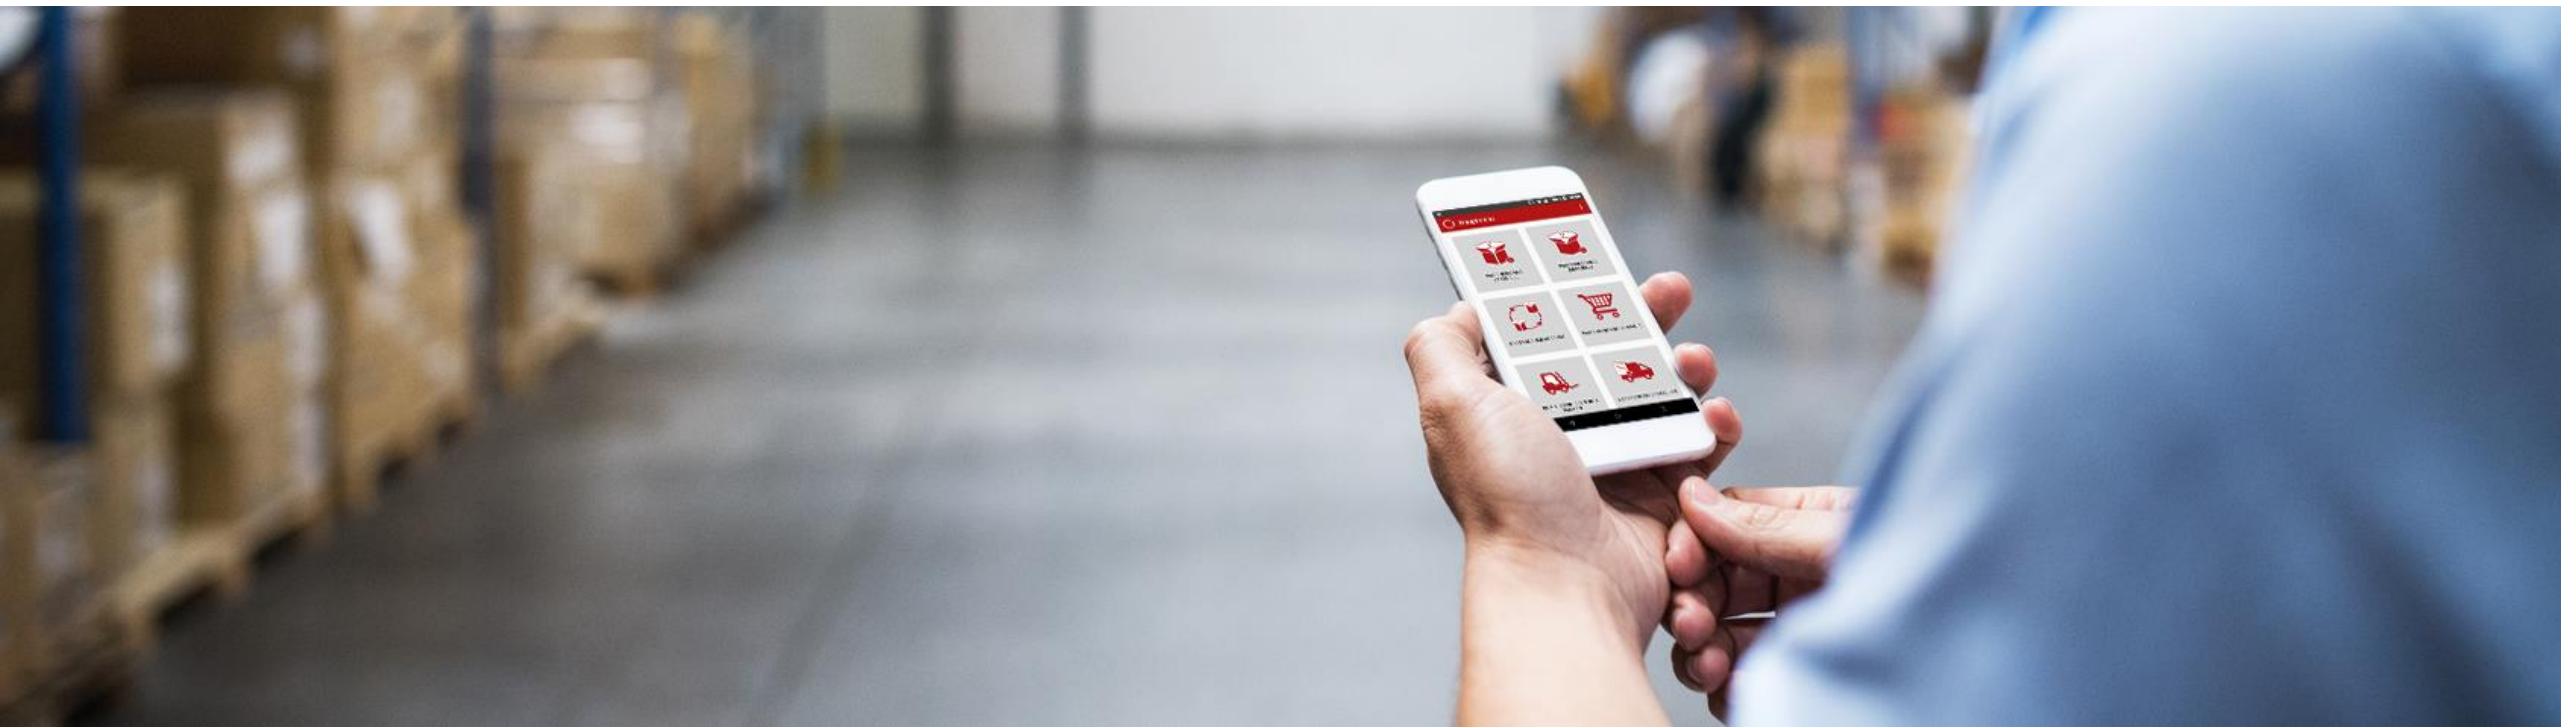

Mobility

Free your business from downtimes and workplaces – with user-oriented apps for SAP Business One, you can always access your system.

Offer your employees the opportunity to use business processes anywhere, anytime – with the mobile device of their choice.

Solution **at a Glance**

Mobile Warehouse Management **for SAP Business One**

Give your employees the technological standard they are used to privately. COBI.wms is a simple and standardized solution with sophisticated details for SAP Business One.

Easily design your warehouse management and logistics with COBI.wms. Avoid duplication of effort and save time managing your inbound and outbound goods, inventory counts, and more.

Thanks to simple implementation and future-oriented mobile technology, you can increase the productivity and efficiency of your business.

Whatever your Device of Choice is, **we've got you Covered**

The app is compatible with both Android barcode scanners and standard Android smartphones. It comes with various standard modules that are equipped with innovative features.

Supported Devices:

- Android Smartphone 5.0+
- Honeywell
- Zebra
- Panasonic
- and more

Improved Control and Collaboration **with COBI.wms**

Taking care of inventory and logistics can create complexity for companies. Minimizing this complexity is critical where visibility and performance is required. With COBI.wms for SAP Business One you can keep track of product inventory, quantity at each warehouse, movement history, and stocking status. Your data is updated in real time so that you can extract insights to meet customer demand and expectation.

You can:

- Increase productivity as a result of time saved and simplified mobile transactions
- Save duplicate work and eliminate paperwork by booking directly from the warehouse into SAP Business One
- Easily and intuitively use your android device of choice

Make it Simple with **Full Integration**

In today's fast paced and ever changing business world, the warehouse needs to connect into many other departments of the business to provide critical information in real time. COBI.wms contains fully integrated functions for modern warehouse logistics in SAP Business One. The solution has a multilingual user interface and is internationally applicable.

You gain efficiency, overview and control – working in the warehouse is simply more fun due to the intuitive operation of the COBI.wms app.
