About SIGMA

The SIGMA Chemnitz GmbH parent company is an experienced system house with over 80 employees at the Chemnitz and Dresden sites and has been offering a wide range of professional services in the fields of information technology, management and organization since 1990. The group of companies has had ERP experience since 1993.

SIGMA Software und Consulting GmbH has been maintaining an intensive partnership with SAP in the field of medium-sized business solutions since 2007.

All our consultants, developers and sales staff are certified by SAP and continuously undergo extensive training. We love SAP Business One!

SIGMA Updating Bill of Material Costs

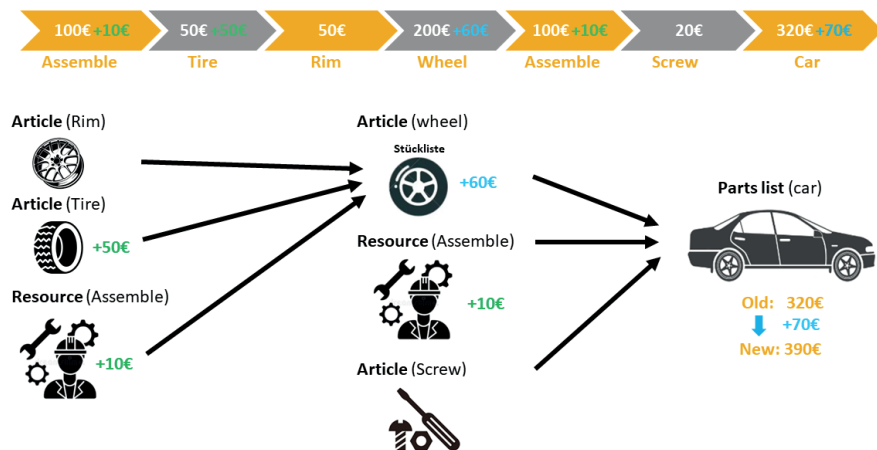

If there are price fluctuations for materials and resources, it is necessary to update your BOM costs. This is the only way to keep your prices in SAP Business One up to date so that you can pass them on to your customers. We have developed the „Update BOM costs“ add-on so that you can carry out this routine work in a time-saving manner.

With the SIGMA add-on, manual updating of your bills of materials is a thing of the past, resulting in several advantages for you: You save valuable time and costs, relieve your employees and input errors are avoided.

Your advantages at a glance

- Elimination of time-consuming updating of individual parts lists
- High time saving
- Quick and easy calculation of BOM costs
- Short implementation time

How does the SIGMA add-on „Update BOM costs“ work?

The individual components of products are listed in a bill of materials. Individual items from parts lists can also be bills of materials themselves - for example, the „Wheel“ parts list in our example is part of the „Car“ parts list. If a parts list is updated, this usually also affects parts lists that contain the previous parts list.

Thanks to our SAP Business One add-on, you now bypass the tedious work of manually updating every single BOM, because an automated update of your prices in all BOMs takes place. Based on price changes of items and resources, BOMs are recalculated so that mass changes of BOM prices are easily possible in the shortest possible time.

The operation of our add-on is quite simple: just select the price list in which the BOMs with the customized item are located. In the table, you can then select the desired articles or resources whose price is to be changed. Afterwards, all parts lists with the new item prices will be calculated automatically.

Stückliste

Produkt: Naturstein_Weg Menge: 1
 Lager: 5000
 Preisliste: Einkaufspreisliste
 Produktion Standardkosten: 0,00000 EUR
 Geplante durchschnittliche Produktionsgröße: 1,00000
