#### About SIGMA

The SIGMA Chemnitz GmbH parent company is an experienced system house with over 80 employees at the Chemnitz and Dresden sites and has been offering a wide range of professional services in the fields of information technology, management and organization since 1990. The group of companies has had ERP experience since 1993.

SIGMA Software und Consulting GmbH has been maintaining an intensive partnership with SAP in the field of medium-sized business solutions since 2007.

All our consultants, developers and sales staff are certified by SAP and continuously undergo extensive training. We love SAP Business One!

### **SIGMA Load Carrier Exchange Account**

The SAP Business One AddOn SIGMA Pallet Account, developed by SIGMA Software und Consulting GmbH, enables you to keep an eye on your expensive and valuable pallets and other load carriers (e.g. Euro pallets or Euro containers) and thus permanently under control.

### **Record delivery information and link it to stocks**

Thanks to the full integration of the SAP Business One add-on SIGMA Pallet Account, it is possible to record and document all load carrier-relevant information on the delivery or goods receipt. Furthermore, a direct link to the relevant delivery note or goods receipt ( order ) can be established.

dun	gsträger-¥erbuch	ung			- 1

	Industriepalette		3	*	
	Thermobox 38 x 32,5	10		Klasse ⊂ ·	waren stark beschädigt
ne	rkungen				
łi	nzufügen Abbr	echen			

In the SIGMA Pallet Account AddOn it is possible to link the forwarder, customer or supplier as a business partner with a pallet movement in a SAP Business One standard entry screen quickly and easily and to enter further information such as vehicle registration number or remarks. Furthermore, SAP Business One documents such as a delivery note or a goods receipt (order) can be linked to a pallet movement.

### **Input matrix**

Several different load carriers (e.g. Euro pallets or pallet cages) can be entered quickly and easily for a transaction using an intuitive input matrix. Incoming and outgoing quantities can be stored for each load carrier. If required, it is possible to enter your own and freely configurable condition classification of the individual load carriers.

It is of course possible to enter further individual information tailored to your own requirements in the form of a comment for each load carrier entered.

## Manage stocks fully automatically with Load Carrier Exchange Account AddOn

Through a clever linking of the SAP Business One standard packaging materials (load carriers) with stock-managed items, stocks of the respective load carriers for the defined warehouse are booked fully automatically via standard goods receipt and / or goods issue. Thus, it is possible at any time to query and display the exact stock level of the respective load carriers by means of SAP Business One standard functions.

# Inventory overview thanks to individually filterable account statement for pallets

An individually filterable load carrier account statement (based on Coresuite Designer) included in the scope of delivery allows you to create a restricted stock overview of the individual load carriers at any time, e.g. per forwarder, customer or supplier.

Confusing negotiations with suppliers, discussions about deviating pallet stocks and time-consuming searches for stocks of load carriers are finally a thing of the past with the SAP Business One AddOn SIGMA Load Carrier Exchange Account.

### We are your partner for SAP Business One

**Digitization with SIGMA!** Whether start-up or medium-sized company - with SIGMA the project turns into a digital journey. SAP Business One is our basis and it's really great. The excitement increases with our mobile solutions for warehouses and it gets really good when we unpack our RFID solutions. What are you waiting for?
