

COBI TIME

Efficient Personnel Time Recording

WORK
Come and go of
your employees

BREAK
Book break times
with one click

PROJECT
Documentation of
working hours in projects

Variable working concepts and complex remuneration models continue to increase and with them the demand for time tracking software. COBI.time is the modern solution for efficient timekeeping with SAP Business One®. With this solution, you are able to easily and quickly book and manage your work, break and project times.

Your data booked in COBI.time is automatically transferred to SAP Business One®. Log in with your access data in the browser and book and document your times from any device. Whether in the office, on the road or via a permanently installed terminal in your company: with COBI.time, time recording is very easy.

Timekeeping

- Come / Go
- Break start / end
- Assign times to projects

With COBI.time you can easily record your working time via the usual web browser or mobile device.

Manual Timekeeping

- Working hours start / end and break time
- Specification of accountable time
- Cost Center / Activity Types / Project

Book or correct your working time manually afterwards.

Useradministration

- Administration rights
- Various manager positions
- Different user positions

Import users from SAP Business One® employee master data and specify their authorizations.

Projectadministration

- Overview of current projects
- Assign users to projects
- Booking working times to projects

Book times against your projects in SAP Business One®.

Work Timesheets

- Day and week time models
- Assign working time accounts
- Evaluation of target and actual times

Define and assign day and week time models to easily evaluate planned and actual times.

Absences

- Overview of all absences
- Submit requests for absences
- Approve of absences

With the application management and approval process, absences are always kept in view.

Transmission

All activities that you book in COBI.time are automatically sent to SAP Business One.
